Species Election

1) Claims 17-47, 52 and 57-68 have been canceled.

Claims 3, 11, 14 and 48 have been amended.

Claims 1-16, 48-51 and 53-56 are under prosecution.

2) This application contains claims directed to more than one species of the generic invention.

The peptide species are deemed to lack unity of invention because they are not so structurally linked as to form a single general inventive concept under PCT Rule 13.1.

(A) SEQ ID NO: 2 (claims 1-3, 5-7, 14-16, 48-51 and 53-56);

(B) SEQ ID NO: 3 (claims 1-3, 5-7, 14-16, 48-51 and 53-56);

(C) SEQ ID NO: 7 (claim 4, 8-16, 48-51 and 53-56);

(D) SEQ ID NO: 8 and SEQ ID NO: 10 (claims 1-16, 48-51 and 53-56) and

(E) SEQ ID NO: 9 and SEQ ID NO: 11 (claims 1-16, 48-51 and 53-56).

The peptide species of SEQ ID number 6 would be examined along with one of species (C) and (D), if elected.

3) This application contains claims directed to more than one species of the generic invention.

The *Francisella* strain species are deemed to lack unity of invention because they are not so antigenically linked as to form a single general inventive concept under PCT Rule 13.1.

(I) *F. tularensis* and *F. tularensis* LVS;

(II) *F. philomiragia* and

(III) *F. novicia*.

See claims 7, 13, 16 and 56. Claims 1-6, 8-12, 14, 15, 48-51 and 53-55 are generic.

4) This application contains claims directed to more than one species of the generic invention.

The negative control peptide species are deemed to lack unity of invention because they are not so structurally linked as to form a single general inventive concept under PCT Rule 13.1.

(a) SEQ ID NO: 4 and

(b) SEQ ID NO: 5.

See claim 54. Claims 48-51, 53, 55 and 56 are generic.

5) Applicant is required under 35 U.S.C 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6) The election of species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, Applicant must indicate which of these claims are readable on the elected species.

Should Applicants traverse on the ground that the species are not patentably distinct, Applicants should submit evidence or identify such evidence now of record, showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C § 103(a) of the other invention.

7) Papers related to this application may be submitted to Group 1600, AU 1645 by facsimile transmission. The Fax number for submission of amendments, responses and/or papers is (571) 273-8300, which receives transmissions 24 hours a day and 7 days a week.
